

Activity Descriptions

Name of the activity	Summary
Splash! Say Goodbye to germs. Who knew it could be fun?!	Listen to a story about what germs are and how to send them away with hand-washing and tooth-brushing
Find invisible germs in your hands!	Are your hands clean? Let's find out with the help of the magical beam!
Grow plants without soil	Make tiny pieces of polymer grow big in water and become a home to future plants
Make your own liquid crystal	Size of each liquid crystal is just a nanometer across...the same size as a virus. Liquid crystals are used in computer monitors, cell phones; digital cameras...Want to learn how liquid crystal are made?
Ben Franklin's electricity machine	Do experiments in electricity the way they did it 300 years ago. Or almost...
Art and Fitness	Invent fun and good physical exercises inspired by artworks from all over the globe!
The Good Germ Chocolate Factory	A scientist and a chef explain how germs help make chocolate yummy. Can you make chocolate from scratch?
Meet friends! Beat the germs!	Are you afraid of infection? Or can you beat it? How many people can YOU communicate with before a germ catches up with you? Discuss, compete and see for yourself to find out!
Scare us, if you can!	What do you think germs look like? Paint them with an artist on a papier-mâché mobile. Your art work will be part of the World Bank collection
The Germ Gang	Make your own germ puppet. What is its name? Imagine how it talks and what it says to its fellow germs... Can you make your puppet dance?
The Germ of Doubt	Help Musician Mr. M finish his musical piece. Compose original music. Come join...you can do it!
What Next?	Get creative about development. Do people know what World Bank does? Do you want to be the one to tell them? Your chance is now! Join us to learn how to enter a video contest for October 15, 2010
